

## Silestone™ Perfectly Cast for Aksarben Cinema

### AKSARBEN CINEMA — OMAHA, NE

Aksarben Cinema, a 10 screen movie theater, anchors the entertainment in the new million square foot mixed-use development Aksarben Village in Omaha, Nebraska. The Village boasts a hotel, 500 housing units, office and research space, and many retail stores and restaurants.

This state-of-the-art theater features all the latest amenities including leather seating, digital signage throughout, and a full-service bar. The surfacing product chosen needed to be in step. That's why the project specifier in Kansas City chose **Silestone Quartz by Cosentino**.

Silestone's Stellar Fire and Stellar Marine push the function of concession, bar, condiment, and ticket counters to reach a level of design feature. According to theater owner Bill Barstow, Silestone provided "the most vivid color options available".

First introduced 20 years ago in 12 colors, the palette for Silestone Quartz has grown to include more than 50 dynamic color selections. Each color is carefully designed and formulated to please the eye while reflecting the most current trends in fashion and style. Silestone colors vary in hue, from the most subtle neutral shades, to the rather brilliant and dynamic tones - always leading-edge with new and unique quartz designs that are fashion-forward.
