vetrazzo

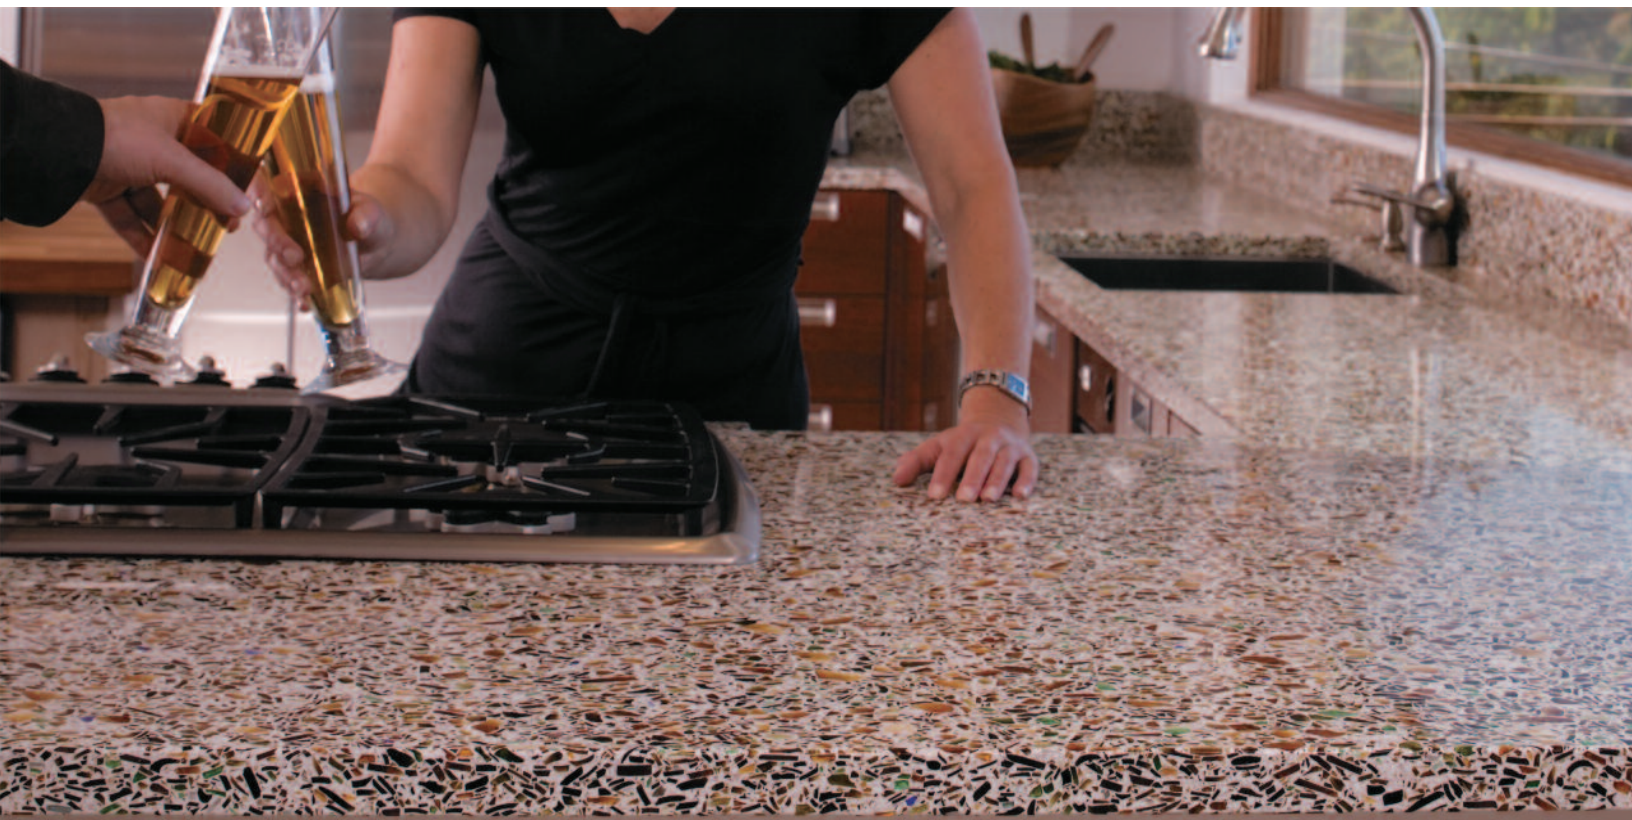

by Polycor

what do you see?

recycled glass [from traffic lights, windows, beverage containers and many other unique sources]

transformed into exquisite surfaces [for countertops, tabletops, vanities, mantels and more]

[www.vetrazzo.com](http://www.vetrazzo.com)

style and values  
without compromise

by using vetrazzo surfaces, you show your respect for the earth and the environment:

- 100% of the glass used in vetrazzo is recycled (and vetrazzo is mostly glass)
- vetrazzo is made in the u.s., using only local materials and labor

redefining "green"  
(not the color)

vetrazzo transforms waste glass into an exquisite work of art, the centerpiece of your living or working spaces. glass sources include:

- bottles
- windows
- traffic lights
- dinnerware
- windshields
- pyrex

## the details

panel size: 5' x 9' x 1.25" (3cm)  
density: 14.6 lbs per square foot  
weight: a panel is about 700 lbs

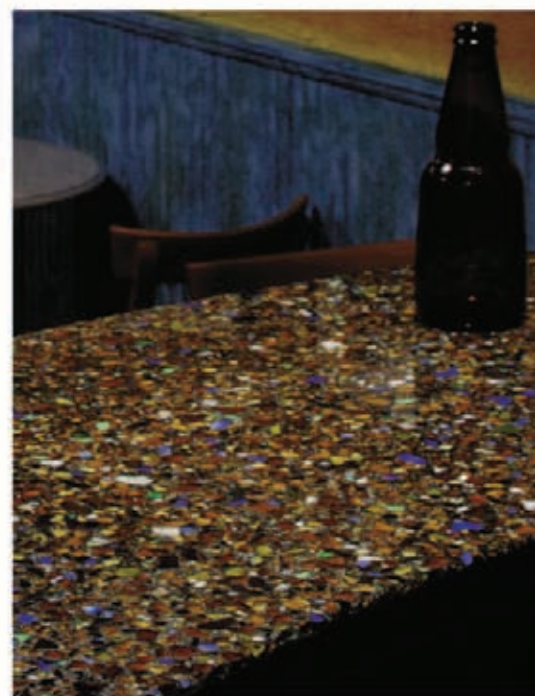

compressive strength: up to 9,000 psi  
tensile strength: up to 1,500 psi  
thermal shock resistance: more than 600°F

## durable and easy to maintain

vetrazzo is extremely durable – it's comparable to granite in:

- strength
- scratch resistance
- heat resistance

and it's easy to maintain. simply wash with soap and water, polish with marble polish when the mood strikes you, and reseal every few years. that's it.

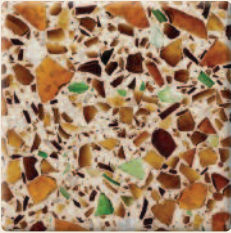

# color palette

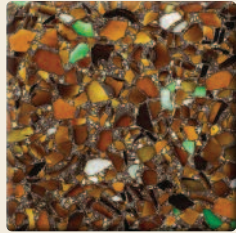

our palette will change based on availability of recycled glass [and the inspiration of our designers]. samples are available from authorized vetrazzo dealers to help you make up your mind.

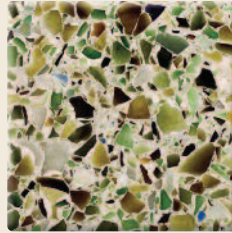

millefiori

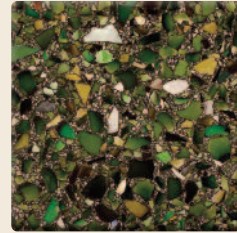

alehouse amber

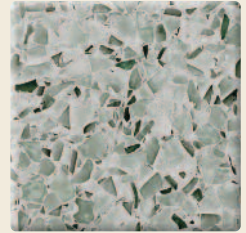

alehouse amber - patina
