DESIGNER PANELS

ARCHITECTURAL RESINS

LUCERE

WHAT IS LUCERE?

Lucere is a collection of resin sheets featuring either encapsulated material, faux stone, deep textures, colour backing, or mirror creating sheets with unparalleled depth and clarity. Almost the entire Lucere range can be fabricated with standard wood working tools and easily installed with glass fittings, providing the perfect solution for applications where the weight and fragility of glass is problematic.

LUCERE FEATURES

- Fabricated with standard wood working tools
- More impact resistant than glass
- Perfect for partitions, screens and lighting
- Easy to maintain

INDEX

LUCERE ENCAPSULATED

LUCEREENCAPSULATED

WHAT IS LUCERE ENCAPSULATED?

Lucere Encapsulated is a range of poured resin sheets. The pouring process encapsulates the various materials creating a sheet with unparalleled depth and clarity. Lucere is perfect for partitions, screens and lighting applications.

LUCERE ENCAPSULATED FEATURES

- Perfect for partitions, screens and lighting
- Fabricated with standard wood working tools*
- Unparalleled depth and clarity
- Fully refinishable to matt or gloss

*excluding Alchemy and Fency

LUCERE ENCAPSULATED SPECIFICATIONS

SHEET SIZES	48" X 120" (1220mm x 3050mm), 48" X 96" (1220mm x 2440mm) & 39" X 78" (2000mm x 1000mm) Not all designs available in all sheet sizes
THICKNESSES	¼" (6mm), ⅜" (9mm) & ½" (12mm) Not all designs available in all thicknesses
SURFACE FINISH	Gloss, Matt or Gloss / Matt
CUSTOMISABLE	Design - 10 sheet minimum
INDOOR / OUTDOOR	Indoor use only
WET AREAS	Yes - edges must be sealed
FABRICATION	Standard wood-working tools (excluding Alchemy and Fency)
THERMOFORMABLE	Most designs - contact your distributor for details
INSTALLATION	An expansion gap of 1/16" per 36" (1mm per 1 metre) of product should be allowed for when setting out your sheets. Most glass fittings can be used
REFINISHABLE	Fully refinishable to Gloss or Matt
LEAD TIME	8 - 10 weeks. Express delivery is available subject to a surcharge.
CARE INSTRUCTIONS	In most instances, warm water, mild detergent, and a soft sponge, cloth or chamois will be enough to clean Lucere.
ENVIRONMENTAL INFORMATION	Easily recycled. Contact your distributor for details
ADDITIONAL COMMENTS	1. Being handmade, slight imperfections in Lucere are deemed acceptable. These slight imperfections may include small bubbles in the interlayer or slight surface texture imperfections. Any imperfection that is not visible 36" (1 meter) away from the panel is deemed within commercial tolerance. 2. Lucere sheets may not be perfectly flat. Due to this, it is always suggested that the sheet be fully framed or mechanically fixed. 3. Natural products used in Lucere are seasonal. As such, variations in colour and density may occur between samples and the order. If this detail is critical, a sample of current stock should be produced for final approval which will add up to 3 weeks to the ordering process. 4. Lucere can be used as a splashback but NOT behind a stove or cooktop. We recommend a minimum distance of 12" (300mm) from stove or cooktop.

LUCERE MONOLITHIC

LUCEREMONOLITHIC

WHAT IS LUCERE MONOLITHIC?

Enjoy the aesthetic of natural stone without any drawbacks. The Lucere Monolithic range combines the look and feel of stone with an incredible translucent quality to provide a product that is easy to install, can be refinished and has a stain resistant surface. Lucere Monolithic is ideal for use in a wide range of environments such as bars, hotel lobbies and restaurants.

LUCERE MONOLITHIC FEATURES

- Fabricated with standard wood-working tools
- Perfect for screens and cladding
- Great when backlit

LUCERE MONOLITHIC SPECIFICATIONS

SHEET SIZES

48" X 96" (1220mm x 2440mm)

THICKNESSES

¼" (6mm), ⅜" (9mm) & ½" (12mm)
Not all designs available in all thicknesses

SURFACE FINISH

Matt or Gloss (depending on design)

CUSTOMISABLE

Contact your distributor for details

INDOOR / OUTDOOR

Indoor use only

WET AREAS

Yes - edges must be sealed

FABRICATION

Standard wood-working tools

THERMOFORMABLE

Contact your distributor for details

INSTALLATION

An expansion gap of ⅛" per 36" (1mm per 1 metre) of product should be allowed for when setting out your sheets. Most glass fittings can be used

REFINISHABLE

Fully refinishable to gloss or matt

LEAD TIME

8 - 10 weeks.
Express delivery is available subject to a surcharge.

CARE INSTRUCTIONS

In most instances, warm water, mild detergent, and a soft sponge, cloth or chamois will be enough to clean Lucere.

ENVIRONMENTAL INFORMATION

Easily recycled. Contact your distributor for details

ADDITIONAL COMMENTS

1. Being handmade, slight imperfections in Lucere are deemed acceptable. These slight imperfections may include small bubbles in the interlayer or slight surface texture imperfections. Any imperfection that is not visible 36" (1 meter) away from the panel is deemed within commercial tolerance.
2. Lucere sheets may not be perfectly flat. Due to this, it is always suggested that the sheet be fully framed or mechanically fixed.
3. Lucere can be used as a splashback but NOT behind a stove or cooktop. We recommend a minimum distance of 12" (300mm) from stove or cooktop.

LUCERE TEXTURES

LUCERE TEXTURES

WHAT IS LUCERE TEXTURES?

Lucere Textures is a range of panels with a deep texture that is unable to be achieved in other translucent materials. The panels come in clear or with a green tint to closely emulate glass but are 40 times more impact resistant than glass. Lending an air of sophistication and elegance, the clear variants can even be used outdoors.

LUCERE TEXTURES FEATURES

- 40 times more impact resistant than glass
- Easily fabricated
- Cost effective textured solution
- Custom colours/tints available
